Microsoft 365

A complete, intelligent, secure solution to empower employees and IT

Office 365

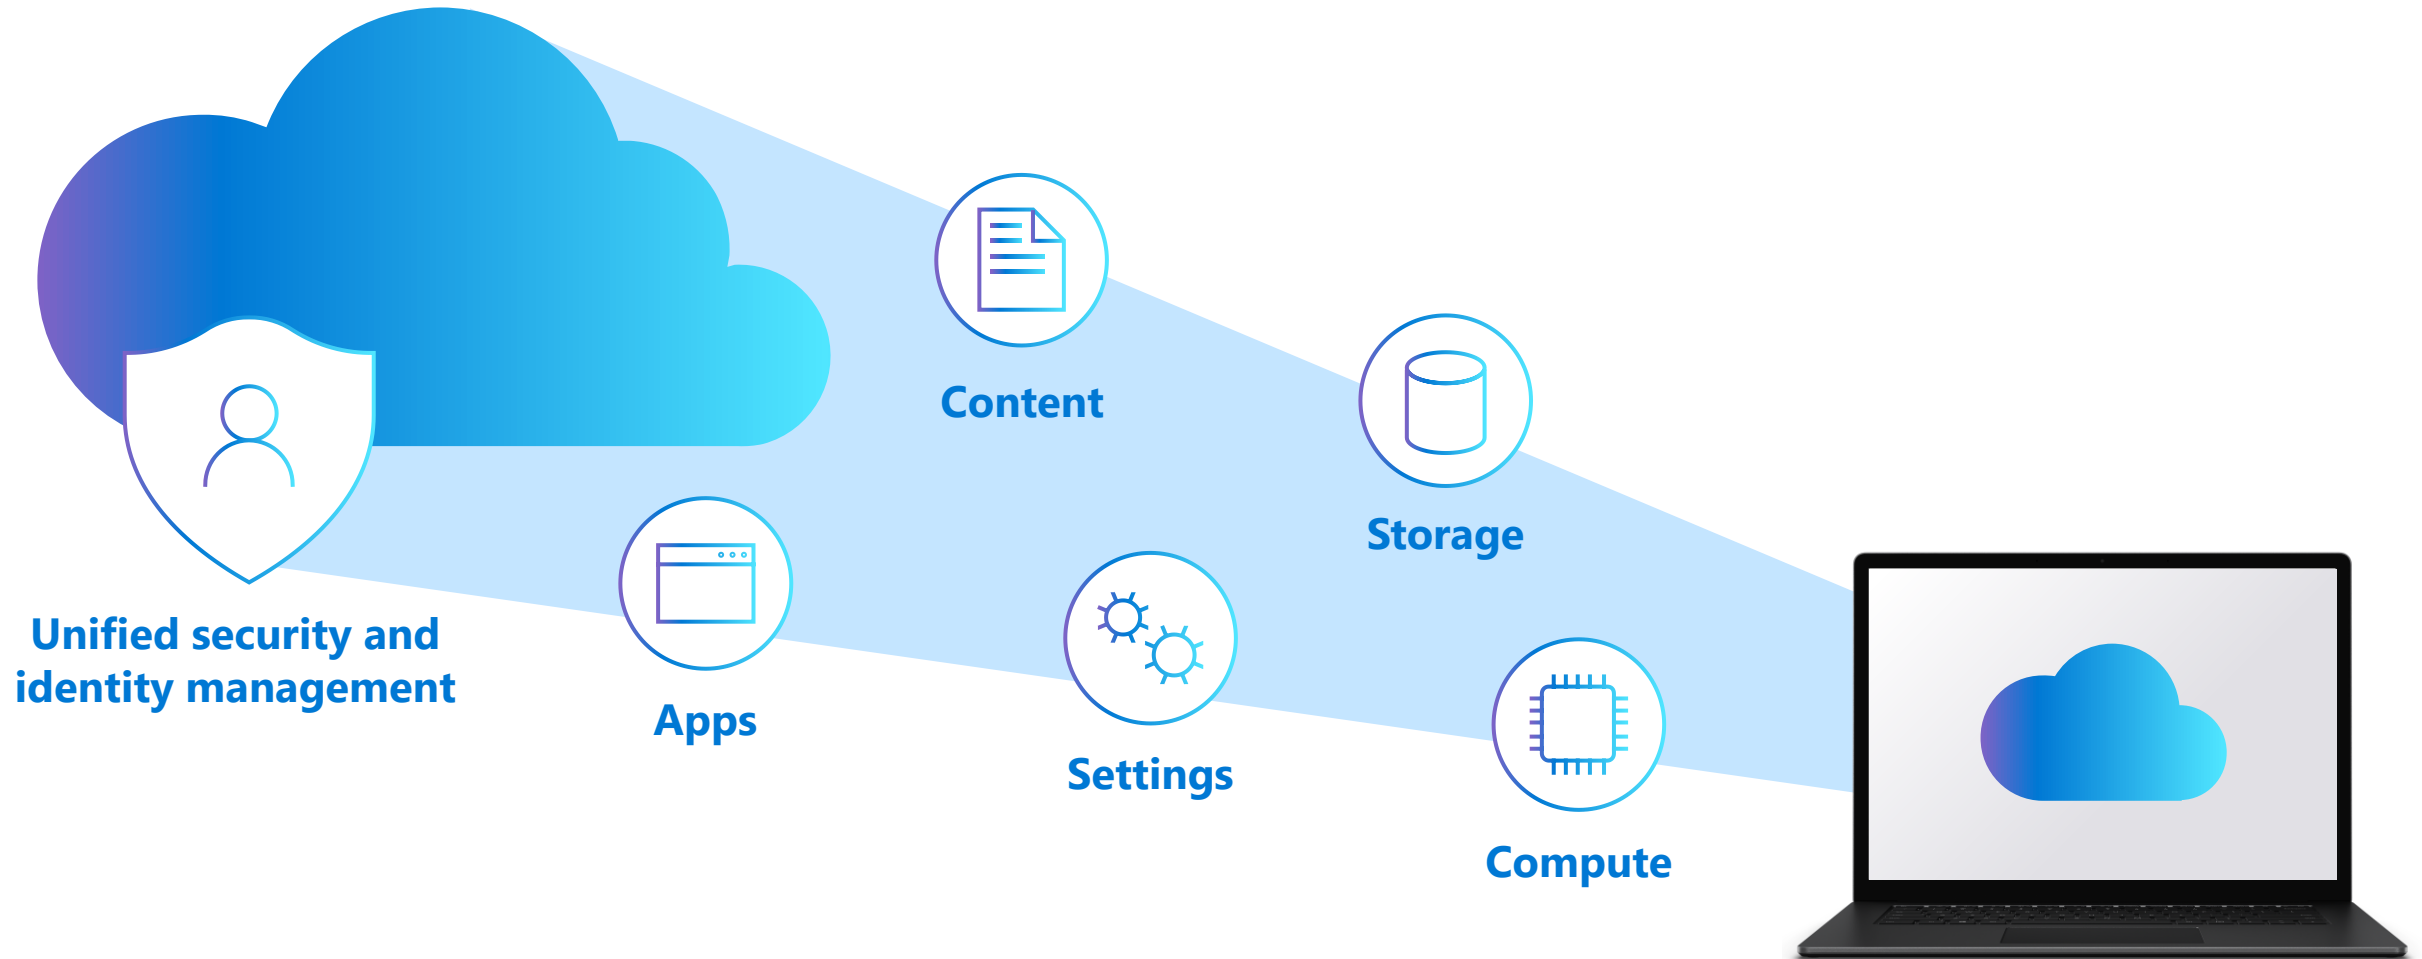

Windows 10

Enterprise Mobility +
Security

Windows 365

A new solution for today's hybrid workforce

Windows 365 Business

For small and medium businesses

Simplify setup, deployment, and management of Cloud PCs with easy, direct purchasing.

Windows 365 Enterprise

For enterprise customers

Include Cloud PCs with centralized end-to-end management using Microsoft Endpoint Manager.

The right technology for all your needs

Cloud PC – Windows 365 Optimized for simplicity	Cloud VDI – Azure Virtual Desktop Optimized for flexibility
Windows 10 or Windows 11 (Windows 365 Enterprise) personalized desktop	Windows 10, Windows 11 or Windows Server multi-session desktops
Complete end-to-end Microsoft service	Remote app streaming
One-stop administration in Microsoft Endpoint Manager (Enterprise edition)	Full control over configuration and management
Direct self-service model (Business edition)	Citrix and VMware support
Predictable per user pricing	Flexible consumption-based pricing

Demo Scenario

- 1000 store;
- 2600 unmanaged devices:
 - 1400 Samsung S20, S21;
 - 400 Windows 7;
 - 300 Windows 8.1;
 - 500 Windows 10.
- VPN, MPLS & SD-WAN Connections;
- On-Premises Infrastructure;
- High maintenance costs of hardware and network infrastructure

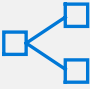

- Microsoft 365 E3/E5 subscriptions;
- Windows 365 Enterprise subscriptions;
- Samsung Dex Stations;
- Mobile devices managed with MEM;
- Universal Print ready printers;
- Hybrid Infrastructure;
- Physical desktop PC retirement;
- Removal of VPN, MPLS and SD-Wan connections
- Low costs and management effort

DEMO

Technical and license requirements

License		Users w/ Windows Pro endpoints: W10 E3 + EMS ¹ E3 or M365 F3/E3/E5/BP Users w/ Non-Windows Pro endpoints: Win VDA E3 + EMS ¹ E3 or M365 F3/E3/F5/BP
Azure Subscription		At least 1 needed for an Azure Virtual Network
Network		Azure Virtual Network with line of sight to Domain Controller
Machine Identity		Hybrid Azure AD Join (HAADJ)
User Identity		Hybrid users (AD + AAD)
Image		Gallery or BYO in Azure (Win10 Ent 19H2+)
Management		Microsoft Endpoint Manager (supports SCCM co-management)
Admin Permissions		M365: Intune Service Admin (standard MEM RBAC after provisioning) Azure: Subscription Owner (setup network connection)

1. Intune + AADP1 can be used as substitute for EMS E3
